

Environmental and Energy Policy

The Metal-Core Technologies Environmental and Energy Policy is to uphold the highest standards in protecting the environment during our business operations. Metal-Core Technologies is committed to complying with accepted environmental practices and aspires to be a landfill-free organization that allows its facilities to reduce their waste footprint, while creating greater environmental awareness among Team Members and communities where it manufactures product.

Our commitment includes meeting or exceeding applicable legal and other requirements, continuous improvement of our Management System, minimizing the creation of wastes, reduction in the consumption of energy and the prevention of pollution.

Metal-Core Technologies will manage our goals, processes, materials and Team Members in order to reduce the environmental impact and to continuously improve the energy efficiency associated with our work.
